Divyanshu Dhanraj

Senior Engineer

SUMMARY

Seasoned, solution-oriented, forward-looking **software engineer** with 5.9 years of experience. Skilled in .NET 8 **Microservices**, ASP.NET Core Web API, MVC, Razor Pages, **Angular** with Clean Code Architecture, DDD. I aim to create loosely coupled software. Committed to continuous learning and staying current with industry trends to provide forward-thinking solutions that align with business objectives.

EXPERIENCE - 5.9 Years

Aspire Systems / Hyderabad, India — *Senior Engineer*

June 2022 - Sept 2025, Exp 3.4 years

Project: KPMG - Singapore

- Designed a scalable microservices-based system for Business Registration & KYC (Singapore) covering data capture, validation, verification, approval workflows, and document generation (PDF/Word).
- Implemented two core microservices: (1) Capture & Approval Service, (2) asynchronous Data Processing Service for storing approved data, updating the database, and ensuring accurate data presentation.
- Enabled asynchronous communication using **Azure Service Bus** for message queuing/publishing between services.
- Built an asynchronous Email microservice to notify approvers during workflows and send final approved data to company owners.
- Tech stack: .NET 8, ASP.NET Core Web API, Angular 18, SQL Server, Microsoft Azure, Jira, Syncfusion.

Project: Balfour - eCommerce

- Worked on a complex, multi-technology project involving ASP.NET MVC, Vue.js, SQL Server, LINQ, Web Services, and legacy ASP.NET (ASPX).
- Handled peak-season bug fixing, analyzing and resolving critical issues within tight timelines to maintain system stability and performance.
- Quickly identified, debugged, and fixed issues, including overcoming challenges in Vue.js (new technology) by finding root causes and implementing effective solutions.

Project: Greenpath - Financial Wellness | Debt Services

- Worked on multiple modules (Document Management, Accounting, Counseling) using .NET 6 Core Web API **Microservices**, **gRPC**, Clean Code Architecture, SQL Server, and Entity Framework Core.

- Built microservices using gRPC and **BFF pattern** in an Agile (2-week sprint) DevOps environment; implemented async communication via **Apache Kafka** to process data and generate PDF/Word documents.
- Developed document features using Syncfusion, WinWord, and integrated Adobe Sign agreements.
- Solved dynamic ZIP creation with size limits using background services and implemented email notifications upon completion.
- Wrote unit & integration tests using xUnit and actively participated in Agile ceremonies (Sprint Planning, PBI Elaboration, Retrospectives, Client Meetings).

Project: LearnOs - School Management System

- Worked on two modules using ASP.NET Core Web API, Clean Code Architecture, and **CQRS pattern** with **Angular (MFE)** and **MongoDB**.
- Developed scalable Web APIs and Angular MFE based on user stories; integrated MongoDB using MongoDB Driver and LINQ for efficient data operations.
- Contributed to backend development and frontend bug fixing in Angular, and managed tasks using Jira.

Planet E-Com Solutions / Peera Garhi, Delhi, India — *.NET Developer*

March 2021 - June 2022, Exp - 1.4 years

Project: USHA Chatbot

- Independently designed and developed a chatbot backend system from scratch using ASP.NET Core Web API, ADO.NET, and SQL Server with Clean Code Architecture.
- Optimized performance via efficient APIs and SQL Stored Procedures, including R&D and indexing strategies for Heap tables.
- Built Hosted Background Services to automate daily data ingestion from Data Lake to a custom database, with robust scheduler failure handling.

Project: Report Management

- Developed a project from scratch with an Admin Panel and Reporting Website using ASP.NET Core Web API, **Razor Pages**, Entity Framework Core, SQL Server, and Clean Code Architecture.
- Enabled data-driven reporting (graphs, data tables) with auditing, allowing users/admins to input data via the admin panel.
- Built custom Web APIs for client systems to push data directly for report generation, including client handling and coordination.
- Performed database migration from Oracle Database to SQL Server using Microsoft SQL Server Migration Assistant for Oracle.

Project: Training Management

- Contributed to a large-scale training platform in a team of 5 using ASP.NET Core Web API, Razor Pages, Entity Framework Core, and SQL Server.
- Developed a module to send emails from selected data table rows and maintain records in the database.
- Collaborated directly with clients by visiting their office, identifying real-time issues, and debugging/fixing bugs efficiently.

Project: PNB - KYC Process

- Designed and developed a KYC Verification system from scratch, including Web API and Admin Panel using ASP.NET Core Web API, Razor Pages, and SQL Server.

- Implemented a scheduler-based data transfer mechanism to move data from production to live database using SQL Server.

Some maintenance projects

- Worked on USHA Dealer Portal Project, focusing on bug fixing and issue resolution to improve system stability.
- Implemented push notifications using Firebase to alert users about tender end dates at scheduled intervals.

Professional Break

Dec 2020 - Feb 2021, Exp - 3 months

Project: Blogging Project

- Worked as a solo freelancer to develop a blogging platform using ASP.NET Core MVC with a two-project architecture (Admin & Visitor) sharing a single database.
- Implemented Authentication & Authorization using cookie-based authentication and claims-based policies.
- Applied Repository Pattern and used Entity Framework for efficient data access and maintainable code structure.

SJM Softech Pvt. Ltd. / Moti Nagar, Delhi, India — .NET Developer

Feb 2020 - Nov 2020, Exp - 10 months

Project: Dickerson Transportation Solutions - Transportation System

- Worked in an Agile team to develop a Transportation Application enabling users to select agents based on delivery price and time; built Admin/Master Panels and assignment management.
- Integrated **Bing Maps API** to calculate delivery cost based on source, destination, and weight; designed a loosely coupled architecture improving scalability and maintainability.
- Improved overall performance and delivery speed by ~35% and worked extensively with SQL Server for data optimization.
- Built and maintained applications using ASP.NET Core MVC, jQuery, Ajax, HTML, CSS (with advanced grid features), and ASP.NET Core Web API for backend services.

SKILLS

Web Development: —

[Microservices, Azure Service Bus - 3.4 years], [Microservices with gRPC, Backend For Frontend (BFF) - 1 year], Kafka
[.NET 8:- ASP.NET Core Web API, Entity Framework Core, LINQ to SQL - 5.9 years], T-SQL, xUnit
Angular 18 - 1 year
Ocelot Gateway, RabbitMQ
LINQ, ASP.NET Identity, ASP.NET Core:- MVC, Razor Pages - 2.5 years
HTML, CSS, JavaScript, jQuery, DataTables, ADO.NET, Grafana K6 Load Testing

Database: —

MS SQL Server, MongoDB

Techniques: —

Clean Code Architecture, DDD, SOLID Design Principles, Repository Pattern, CQRS Pattern

Environment: —

Agile Methodology, Azure DevOps, Jira, GitHub

MS Visual Studio IDE, SQL Server Management Studio, Visual Studio Code IDE, MongoDB Compass, Postman, Swagger

GitHub Copilot, Prompt Engineering

Languages: —

C#, OOPs in C#, T-SQL

Soft Skills: — *Time Management, Interpersonal skills, Teamwork*

EDUCATION

IGNOU, Delhi — *Master of Computer Applications*

Currently doing.

IGNOU, Delhi — *Bachelor of Computer Applications*

2019

First Division with 61%

DPS, Dhanbad, Jharkhand — *Senior Secondary CBSE Board*

2015, Science

Passed with 67.2%

DPS, Dhanbad, Jharkhand — *Higher Secondary CBSE Board*

2013

Passed with 8.4 CGPA

COURSES

1. **Microservices Architecture with .NET Core MVC(.NET 8), Entity Framework Core, .NET Identity with Azure Service Bus** - Udemy, Mar 2026
2. **GitHub Copilot(AI Coding Assistant)** - Udemy, Feb 2026
3. **ChatGPT Prompt Engineering for Developers** - DeepLearning.AI, April 2025
4. **Angular - The Complete Guide** - Udemy, Jan 2025

ACTIVITIES

Worked on Projects at the university

1. **Online Shopping Website** - IGNOU MCA

The Online Shopping Project is a web-based application developed in Visual Studio using C#, designed to help users discover and purchase the latest products with various patterns directly from the website. It includes key functionalities such as product management, order management, user management, and inventory management. The frontend was built using ASP.NET, while the backend utilizes SQL Server for efficient data storage and management.

2. **Online Maintenance Management System** - IGNOU MCA

The Online Maintenance Management System is a web-based application that enables a company to manage maintenance contracts for household and industrial clients. It allows customers to book appointments for servicing electrical and electronic appliances such as TVs, washing machines, refrigerators, air conditioners, coolers, and microwave ovens. The system supports two types of services: Preventive Maintenance (scheduled quarterly) and Fault Repair (on-demand based on client appointments), making it a complete solution for online maintenance scheduling. The frontend was developed using JSP, and the backend uses MySQL for data management.

3. **Online Recruitment Tracking System** - IGNOU BCA

The Online Recruitment Tracking System is a web-based application that allows job seekers to register and apply for jobs online, while consultants track candidates' qualifications and experience to match them with suitable opportunities. The system streamlines the recruitment process by efficiently managing candidate data and job applications. The frontend was developed using JSP, and the backend uses MySQL for data management.

PERSONAL DETAILS

Date of Birth	-	30/12/1997
Gender	-	Male
Marital Status	-	Unmarried
Nationality	-	Indian
Linguistic	-	English, Hindi, Spanish

I hereby declare that the particulars furnished above are true to the best of my knowledge.
